

Violet Bridge Security

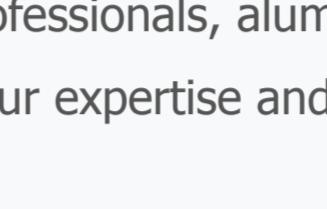

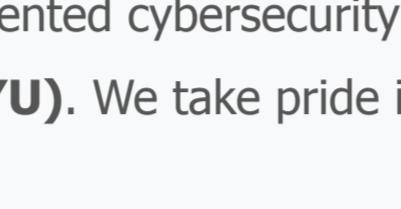

Service Portfolio 2025

Turning human risk and complex technology into measurable resilience

Violet Bridge Security LLC is a practitioner-led cybersecurity consultancy focused on turning human risk and complex technology landscapes into measurable resilience. Founded by alumni of the **Master of Science in Cybersecurity program at New York University (NYU)**, we bring academic rigor and real-world experience to every engagement.

Our services follow a proven **Three-Pillar Methodology** (Security, Visibility, Administration) and are aligned with leading frameworks such as **NIST CSF**, **ISO 27001**, and **CIS Controls**, supporting executive decision-making, regulatory expectations, and modern cloud-first architectures.

About Violet Bridge Security

Our Foundation

Violet Bridge Security was founded on the belief that true cybersecurity excellence is built on **knowledge, experience, and culture**. Our foundation comes from experienced and talented cybersecurity professionals, alumni of the **Master of Science in Cybersecurity program at New York University (NYU)**. We take pride in our expertise and the research contributions made at the **NYU Center for Cybersecurity (CCS)**.

Over the past decade, our team has faced challenges, made sacrifices, and achieved milestones while working with global teams on complex cybersecurity projects across diverse industries. These experiences shaped not only our technical proficiency but also our commitment to building secure, sustainable, and people-centric digital environments.

Why "Violet Bridge"?

The name **Violet Bridge Security** pays homage to our roots in New York. The Brooklyn Bridge, one of the city's most iconic landmarks since its opening in 1883, symbolizes resilience, connection, and innovation. Its suspension cables—designed by NYU Polytechnic students—reflect the same spirit of engineering and vision that drives our work today.

If there is one color that represents both the Brooklyn Bridge and our alma mater, it is **violet**, NYU's defining color. The **NYU Tandon School of Engineering**, with origins dating back to 1854, embodies the principle that "you can be born anywhere, but made right here in Brooklyn." Violet Bridge Security carries that same spirit forward: connecting global expertise with local challenges, bridging innovation with practicality, and transforming cybersecurity from a technical barrier into a strategic advantage.

Our Mission

We don't just protect systems—we empower organizations to thrive with confidence in a digital-first world. We help organizations transform their security posture from reactive compliance to measurable resilience—bridging the gap between human behavior, complex technology, and business outcomes.

Our Three-Pillar Approach

Every engagement follows our proven **Three-Pillar Methodology**: Security, Visibility, and Administration. This framework ensures that our solutions are comprehensive, sustainable, and aligned with your business objectives.

Security

Tiered security strategy aligned to corporate OKRs and risk-based priorities, from threat modeling to Zero-Trust architecture

Visibility

Attack surface management, telemetry depth, and risk exposure translated to C-level language reflecting risk appetite

Administration

Governance, ownership, and continuous improvement—ensuring outcomes last beyond projects with embedded change management

Practitioner-Led

Not sales-driven. We roll up our sleeves and work alongside your teams to implement real solutions

Headquartered in Wyoming and serving organizations nationwide, we bring fresh perspective combined with deep technical expertise forged at one of the world's leading cybersecurity programs. We're not another vendor trying to sell you something—we're your partners in building a security program that truly works.

Our Services

SASE

1 Implementation Services

End-to-end implementation, configuration, and optimization of Secure Access Service Edge (SASE) platforms. We provide hands-on deployment and tuning services for **Skyhigh Security** and **Netskope** environments.

What We Deliver:

- Tenant configuration review and baseline assessment
- Policy design and optimization (SWG, CASB, ZTNA, DLP, SD-WAN)
- Architecture design and phased rollout planning
- Identity integration (Azure AD, Okta) and authentication setup
- SIEM/XDR integration and operational documentation
- Alignment to NIST CSF, ISO 27001, and CIS Controls

Expected Outcomes:

- Production-ready, fully documented SASE environment
- Reduced false positives and improved threat detection
- Clear accountability and operational readiness

Security

2 Awareness Training

Targeted training for employees and VIP personnel focused on real-world threats. Our programs use cognitive science principles and scenario-based learning to build lasting secure behaviors.

What We Deliver:

- Phishing simulations tailored to your industry and threat landscape
- Behavior-based micro-training triggered by user actions
- VIP coaching for executives and high-risk personnel (BEC, spear phishing, vishing)
- Training on travel security, social media exposure, and confidentiality
- Development of personal security playbooks for leadership
- Executive reporting on trends and risk areas

Expected Outcomes:

- Improved recognition of phishing and social engineering
- Higher and faster reporting rates for suspicious activity
- Enhanced protection for high-value targets

Corporate Security

3 Awareness Program

Strategic implementation of a data-driven, business-aligned security awareness program. Built on phishing simulations and real security event data from your organization to create measurable behavior change.

What We Deliver:

- Program design aligned to business objectives and risk appetite
- Analysis of actual security incidents to inform training priorities
- Data-driven simulation campaigns based on real attack patterns
- KPI definition and tracking (click rate, reporting rate, time to report)
- LMS integration and security champion network activation
- Quarterly learning plans and continuous program optimization
- Board-level reporting demonstrating measurable risk reduction

Expected Outcomes:

- Awareness program that supports business priorities
- Measurable reduction in human-related security incidents
- Culture of security embedded across the organization
- Clear metrics demonstrating program ROI

Ready to Build Measurable Resilience?

Let's discuss how Violet Bridge Security can help your organization reduce risk and operate with confidence.
